Saw Blades	Description	PRICE
8200 HG	200-Tooth hollow ground, steel blade. The 8200HG is a must for thin cutting polycarbonate sheets (Lexan) and Sintra. Because of its high tooth count, the blade is also a good choice for cutting thin wood panels.	\$79
840ATB	40-Tooth alternate tooth bevel, carbide tipped blade. This is a good low-cost combination blade that is good for horizontal and vertical cutting of wood sheets such as plywood, MDO and MDF.	\$139
860ATB	60-Tooth alternate tooth bevel, carbide tipped blade. This is an excellent choice, high quality saw blade for fine wood and foam core material.	\$179
860TCG	60-Tooth triple chip grind, carbide tipped blade. A good quality general-purpose blade for cutting plastics. Recommended for sign and display makers cutting a wide range of plastic materials	\$179
860NRTCG	60-Tooth negative rake, triple chip grind, carbide tipped blade. Has a special negative tooth angle that is ground for the very best cutting on aluminum faced panels. Also a good choice for cutting non-ferrous metal substrates.	\$189
860TCGS	60-Tooth triple chip grind, carbide tipped blade. This premium blade is the best choice for cutting a wide range of acrylics, coroplast, plexiglass, and thin aluminum. It can be used as a multi-purpose blade in sign shops working with a variety of material.	\$209
3 BLADE PACKAGE	The 3 blade package includes the 860TCG, 860NRTCG, & 860ATB blades, ideal for processing plastics, aluminum, wood and composite material. Save 30% with this package	\$379
